

Abasiama Essien – Senior Mobile Engineer (React Native)

Senior Mobile Engineer specializing in cross-platform development with React Native, building scalable production applications for Android and iOS.

Experienced in leading end-to-end mobile development, designing maintainable architectures, optimizing performance, and integrating robust backend services using Node.js, Laravel, and Java Spring Boot to deliver reliable, high-impact mobile products.

Experience

QClose – Senior Mobile Engineer

May 2024 – Present

Led the development of multiple production mobile applications using React Native, delivering scalable cross-platform solutions for Android and iOS.

KEY CONTRIBUTIONS:

- Designed and implemented mobile architecture for multiple company products
- Developed complex mobile interfaces using reusable UI component systems
- Integrated mobile apps with backend services built with Node.js, Laravel, and Spring Boot
- Optimized mobile performance and improved API response efficiency
- Implemented secure authentication and API communication layers
- Mentored junior developers and guided mobile development best practices

IMPACT:

- Delivered three production mobile applications used internally by the organization
- Improved application performance and reliability through backend optimization
- Established reusable UI systems that accelerated mobile development across products

Groomlog– Software Development Lead

June 2022 – March 2024

Led development efforts across frontend and backend systems while improving application performance and user experience.

KEY CONTRIBUTIONS:

- Designed scalable component-based architecture using React
- Led UI/UX transformation improving user engagement by 40%
- Implemented Progressive Web App features for offline capability
- Developed backend services using Java Spring Boot
- Introduced code review processes improving code quality and stability

IMPACT:

- Reduced development cycles by 30%
- Increased product engagement and usability

Nestlypay – FrontEnd Engineer

Dec 2021 – April 2022

- Successfully reduced page load times by 50% through meticulous optimization of frontend assets and implementing performance best practices. This achievement not only significantly improved user experience but also positively impacted search engine rankings and overall site responsiveness.
- Led a project to achieve flawless cross-browser compatibility for a complex web application, ensuring a consistent and seamless user experience across major browsers. This effort eliminated user-reported issues, enhancing the application's accessibility and broadening its user reach.

Education

B.Eng Electrical & Electronic Engineering
Federal University of Agriculture Abeokuta

Core Skill

Mobile Development
React Native
Cross-Platform Mobile Architecture
Mobile Performance Optimization
Mobile UI Systems

Backend Integration
REST APIs
Node.js
Laravel
Java Spring Boot

Mobile Tooling

Android Studio
Xcode
Play Store Deployment
App Store Deployment

Technologies

JavaScript
TypeScript
PostgreSQL
MySQL
MongoDB
Git
Docker
CI/CD
